

AUTOMATIC ROTARY CAPPING MACHINE

High Performance & Operating Efficiency

- Smooth Hysteresis magnetic clutches and custom chuck designs for precise cap torque control
- Pick and place cap handling system to reliably place closures for application
- Multiple sorting and container gripping options to support various cap and container styles
- Speeds up to 500 CPM for stand alone or monobloc operation
- Durable construction (built in the U.S.A.) with standard 1 year warranty

ROTARY HIGH SPEED CAPPER

Precision Engineered
Capping Solutions

Options:

- Choice of 5 different sorting systems to support various caps
- Arrange capping turret with variable speed chuck control
- All stainless steel upgrade for the capping turret
- Integrated frame top deck gutters and drain for washdown environments
- Universal cap chutes and escapements
- Explosion proof or chemical resistant arrangement
- Variable speed conveyor drive systems
- Additional electrical upgrades for improved safety and operator usability

Standard Features:

- Accommodates numerous cap styles, shapes and sizes
- Supports round, oval, square and rectangular containers
- Hysteresis “smooth torque technology” magnetic headsets with stainless steel construction
- Numerous single and 3-piece chuck designs for various cap styles
- Pick and place cap transfer starwheel system with no-bottle/no-cap functionality
- Container gripper or anti-twist outer guide tension system for round containers
- Capping turret cam system with carbon steel and stainless steel construction has zero-maintenance bushings and bearings
- Quick-change, tool-less container handling change parts
- Centralized lubrication system
- Electronically powered turret and cap pick-off elevation system
- Capping area safety enclosure with integrated safety switches
- Sanitary single piece channel conveyor design with raised wear strips
- Durable, all sanitary 304 stainless steel frame with sanitary leveling pads
- Allen Bradley drives, PLC and color touchscreen with setup recipes

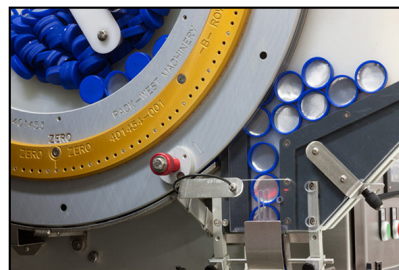

Integrated Solutions:

In addition to rotary capping, sorting and conveying systems, Pacific Packaging Machinery also offers integrated liquid filling solutions with conveyors and complete line controls.

For slower speed applications, Pack West Machinery provides automatic inline spindle capping solutions.
